Signature

## INTERVIEW SUMMARY

On July 10, 2003, a telephonic interview was held between Keith Tackett (an attorney of record) and the Examiner. The Examiner and Mr. Tackett discussed whether input 176 of valve 174 in *Gauthier* (U.S. Patent No. 6,007,330) is capable of functioning as an output. Mr. Tackett emphasized that the input 176 was incapable of functioning as an output because the input 176 will always operate at a lower pressure than the vaporizer 122. The Examiner responded that input 176 is capable of functioning as an output leading to the vaporizer 122. An agreement regarding the claims was not reached.

Respectfully submitted,

Keith M. Tackett
